

FAEEZ KADER

ABOUT ME

Computer Science graduate who ships. I design, build, and deploy full-stack web applications end to end from database schema to production on a live domain including a client platform now serving paying customers. Strong in TypeScript, React, and Next.js, with production experience integrating LLM APIs into useful products rather than demos. Three years of retail management taught me what many junior developers are still learning: how to own outcomes, work to deadlines, solve problems under pressure, and communicate effectively with non-technical people without hiding behind jargon.

WORK EXPERIENCE

Akhal's Spice and More | Assistant Manager | 2022 – 2025

- Built and led a team of 6, handling all recruitment, training, and day-to-day supervision. Stock moved faster, and customer complaints dropped noticeably within the first few months.
- Ran the store's social media and marketing campaigns end-to-end, which brought in more foot traffic and kept regulars coming back without any outside agency or budget.
- Tightened up the entire stock process from supplier orders through to returns, cutting the number of inventory errors found during audits down significantly each quarter.
- Took ownership of the shop floor's look and feel — redesigned product displays around seasonal promotions and kept the visual merchandising consistent with brand standards at all times.
- Managed budgets and maintained financial records month to month, flagging inefficiencies early and keeping the store profitable without cutting corners on staff or service.
- Handled all escalated customer complaints personally and trained the team to resolve issues on the spot, which meant fewer problems reaching management and stronger repeat customer relationships.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Java, C#, Kotlin, SQL, HTML/CSS
- Frontend: React, Next.js, Tailwind CSS, React Three Fiber / WebGL, responsive & accessible UI
- Backend & Data: Node.js, REST APIs, PostgreSQL (Neon), schema design, authentication
- AI Integration: Claude API, Gemini API, prompt design, streaming responses, graceful fallbacks
- Tooling & Delivery: Git & GitHub, Vercel, CI/CD deploys, environment & secrets management, automated testing

EDUCATION

2023 - 2026

Varsity College

- Bachelor of Computer Science in Application and
- Web Development

2018 - 2022

Amity International

- Certificate of Higher Education

CORE SKILLS

Team leadership · Staff training & development · Visual merchandising · Stock control & inventory · Budget management · Customer experience · Sales-floor operations · Social media & marketing · Systems & technology
